Student User Interface

```
import React, { useState, useEffect } from 'react';
import axios from 'axios';
const StudentProfile = ({ studentId }) => {
    const [student, setStudent] = useState(null);
    useEffect(() => {
  const fetchStudent = async () => {
      const response = await axios.get(`/api/student/${studentId}`);
        setStudent(response.data);
      };
```

```
      fetchStudent();
  }, [studentId]);
  return (
    <div>
      {student && (
        <div>

<h2>{student.name}</h2>
          <p>Contact:
{student.contact}</p>
          <p>Grades:
{student.grades}</p>
          <p>attendance:
{student.attendence}</p>
        </div>
```

```
      )}
    </div>
  );
};
```
